

Caw Pike Slab

OS Ref: SD 237 946

Alt: 420m

Grades

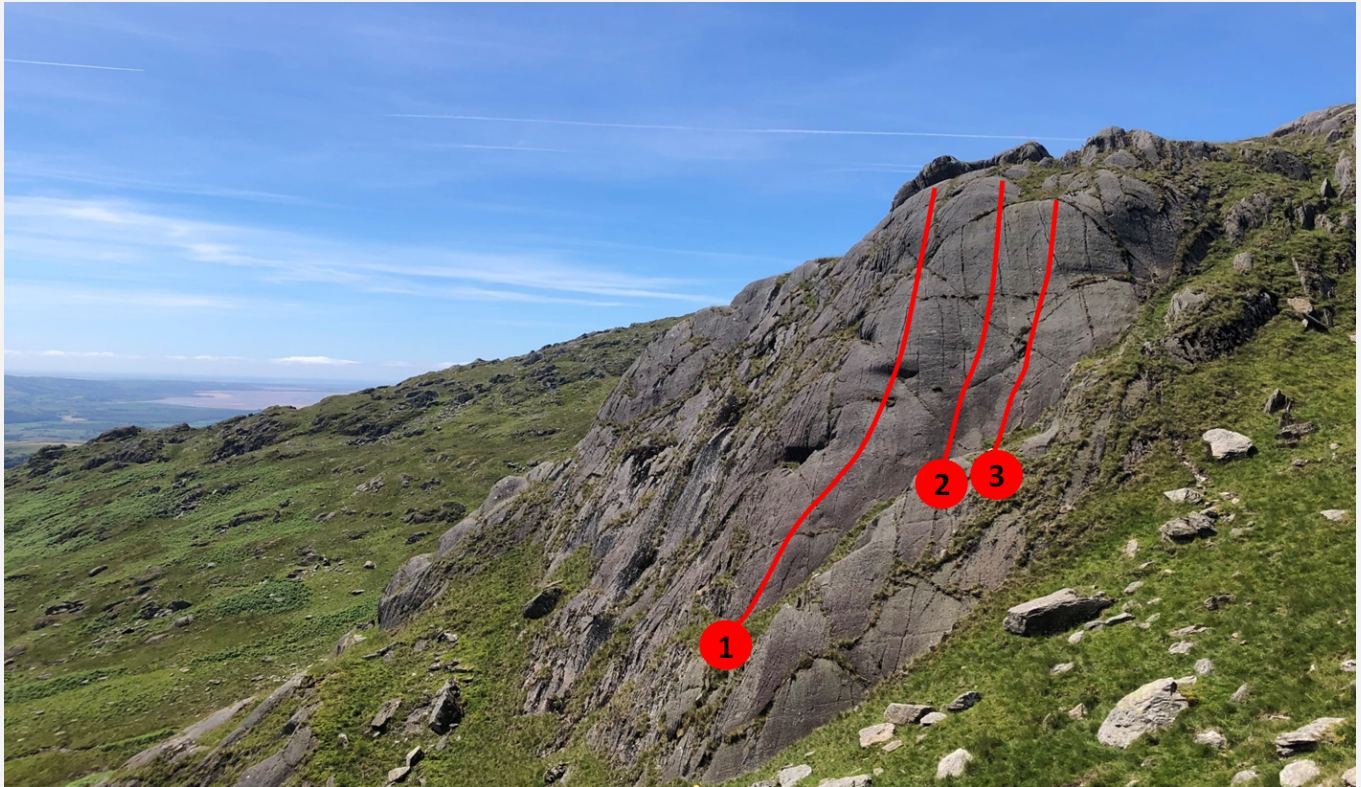

3

A beautiful easy angled glaciated slab of the roughest rock with a fine outlook. Almost certainly climbed on before. Anyhow here are some named routes for the record. The climbing is very easy but more-or-less unprotected, hence the grades.

Approach

Park & approach as for [Lickle Crag](#) and head up through the bracken onto the open fell above. Following the dry stone wall from the Lickle valley path from the footbridge as far as the sheepfold should get you there.

SOUTH EAST facing

Caw Pike Slabs

1 Chaise Longue D 25m

Follow the longest line on the left of the slab easily but without much in the way of meaningful protection.
